

NEO

Wi-Fi Switch PRO

with power meter

Remote control

Turn on/off your electrical appliances from anywhere.

Energy monitor

Monitor real time energy consumption.

Power meter

Demonstrate power trend in different cycles.

Multifunction timers

Countdown, anti-theft and schedule timers.

THINGS TO KNOW BEFORE USING NEO PRO

- Make sure your router is configured to 2.4G, and your smartphone is connected to this 2.4G network.
- Make sure the electronic device shown on your iOS/Android NEO PRO app is the one plugged into the NEO PRO Switch.
- Make sure you have a strong Wi-Fi signal at the NEO PRO Switch.
- The sync and all operations of NEO PRO Wi-Fi Switch are only possible via a Wi-Fi network connected to the internet.
- NEO PRO Switch needs to be setup again when the SSID or password is changed.
- No need to setup the NEO PRO Switch again when you turn it off or unplug it from one socket and plug it into another socket.
- NEO PRO Switch will appear on all iOS/Android devices with NEO PRO app installed and in the same Wi-Fi network.
- The clock of NEO PRO Switch is synchronized to the cloud server, not your local iOS/Android device. So 1-2 minutes delay is perfectly normal.
- NEO PRO Switch has to be synchronized again after the firmware is updated (automatically or manually).

1

Scan the QR code to download NEO app at App Store or Google Play. You can also search keyword "ANKUOO" at App Store or Google Play to download NEO app.

2

Connect your smart device to local Wi-Fi network and launch NEO app. Find "add new device" in the menu.

3

Plug NEO Switch into a power outlet, then press ON/OFF button for 5 seconds and release it. The Wi-Fi indicator light will flash quickly. NEO Switch is now ready for synchronization.

Hard Reset: This procedure allows you to do a hard reset directly from your NEO.

4

Make sure your smart device and NEO Switch are in the same Wi-Fi network. The connecting process takes about 15-120 seconds, depending on your network condition and the length of Wi-Fi password.

5

When configuration is done; the NEO Switch will be shown on the NEO app. You can change the ON/OFF state at the homepage.

6

Click the icon to enter detailed setting page for the device.

Countdown Timer

Turn on/off device plugged into NEO PRO Switch by the time assigned.

Schedule Timer

Perform the same routine operation at the same time in a week for your home appliances.

Anti-theft Timer

Guard your house by randomly turning on/off the lamp plugged into NEO PRO Switch. You choose the time frame and number of slots in this certain period.

When Anti-theft timer is activated, the other two timers will be deactivated.

7

NEO comes with three timer setting modes. You can set them at anywhere with an internet connection using your NEO app.

8

Click the "Energy Info" icon to enter detailed page for the Energy Consumption Information.

9

Demonstrate power trend in different cycles.

10

Click the icon to see the previous 24-hour power trend.

11

Click the icon to see weekly, monthly and yearly energy consumption trends.
